CAPABILITY STATEMENT

CORE COMPETENCIES

Hermathena Labs offers turnkey secure cloud enclaves that are hosted behind a robust security infrastructure.

You'll enjoy a highly scalable and flexible infrastructure that can grow and change with your mission requirements.

Plus, it's a flat-rate service. No more cloud "utility" bills.

Say Goodbye to expensive cloud solutions. Say Hello! To a simple, easy to use, secure cloud solution that doesn't break the bank.

DIFFERENTIATORS

Comprehensive

Machine Learning Firewalls, Multi-Factor Authentication Brokers, and Quantum Enhanced Encryption are included.

Simple

All of it is pre-configured and integrates easily with any hardware or OS, whether it's on-prem or in the cloud.

Affordable

With our flat-rate pricing, exorbitant cloud usage charges are a thing of the past.

PAST PERFORMANCE

### Air Force Technical Applications Center

- Consult for multiple directorates within AFTAC on current and future Information Technology strategies
- Provided data management support, including testing, life-cycle management, and systems administration to maintain and sustain cross-domain data transfer subsystems.
- Responsible for the bi-directional transfer of data between multiple networks of different classification levels, transmission protocol types, and organizations.

Special Operations Command

- Provided uninterrupted communications support.
- Maintained voice and data systems across 6 classification levels.
- Commo lead for a remote Joint Operations Center (JOC) that provided voice, data and video communications support to the Task Force and partner agencies.

U.S. Army

- Coordinated the integration of ground-based ISR platforms into an existing Control Center, including voice/data routing, monitoring, and staffing
- Consulted in the development of a standalone test tool for the Guardrail Common Sensor (GR/CS).
